

Michael G. Koehler, Ph.D.

Principal Scientist

mgkoehler@proaaci.com

331-229-3318

2011 – Present Professional Analysis and Consulting, Inc., Naperville, IL

Principal Scientist and Managing Partner

Technical responsibilities similar to those in previous positions, with emphasis on investigations and analyses involving polymers, plastics, product packaging, composites, coatings, aerosol systems and propellants, chemical characterization of evidence, construction materials, including associated properties, as well as fuels (including biofuels), lubricants, paints, and chemical additives

2008 - 2010 Packer Engineering, Inc., Naperville, IL

Chief Executive Officer

Responsibilities included technical investigations and strategic leadership for this engineering consulting firm which provides technical solutions to problems in design, manufacturing, and processes. Technical investigations focused on critical issues involving polymers, plastics, construction materials, as well as industrial materials and chemistries. Investigations included cause and origin investigations, failure analysis, and custom testing to solve problems for industry, the insurance and legal communities, government, and academic organizations.

2005 - 2008 Honeywell Aerospace, Des Plaines, IL

Director, Advanced Materials and Processes

Responsibilities included strategic leadership of the Aerospace Materials and Process Research and Technology teams in Morristown, NJ, and Des Plaines, IL. Aerospace Advanced Materials and Process technology development program included innovations for polymers and plastics, composites, advanced coatings, membranes, fuels, alloys & catalysts. This also included oversight of Black Belt and Green Belt scientist and engineers for Design for Six Sigma, Design for the Environment, Design for Manufacturing programs, and Lean Six Sigma.

**1998 – 2005 Center for Catalysis and Separations Technologies, Honeywell
Aerospace, Engines and Systems, Des Plaines, IL**

Senior Technical Manager

Responsibilities included research and leadership in aerospace environmental control systems, space life support systems, air quality technology, water treatment technologies, fuel cell technologies, chemical demilitarization, chem/bio protection, process chemistry and engineering, polymerization catalyst, catalytic oxidation processes, adsorptive separations, membrane separations.

**1996 – 1998 Chemical Process Technologies, AlliedSignal (Honeywell
predecessor company), Research and Technology, Des Plaines, IL**

Skill Center Leader

Responsibilities included research and technical leadership in aerospace environmental control systems, space life support systems, air quality technology, water treatment technologies, fuel cell technologies, chemical demilitarization, chem/bio protection, process chemistry and engineering, polymerization catalyst, catalytic oxidation processes, adsorptive separations, membrane separations.

**1995 – 1996 Modeling and Simulations Technologies, AlliedSignal (Honeywell
predecessor company), Research and Technology, Des Plaines, IL**

Skill Center Leader

Responsibilities included research and technical leadership in process and chemical modeling and simulations, statistical process controls, Six Sigma Continuous Process Improvement strategies, molecular modeling and quantum chemistry simulations, advanced process controls and process optimization.

**1994 - 1995 Thermosets and Composites, AlliedSignal, Research and
Technology, Des Plaines, IL and Morristown, NJ**

Skill Center Leader

Responsibilities included research and leadership in electronic printed circuit board laminate composites, thermoset resins formulations, engineered plastics composites, advanced polymeric fibers, ballistic materials composites (SPECTRA Fibers™).

**1992 - 1996 AlliedSignal, Research and Technology, Des Plaines, IL and
Morristown, NJ**

Total Quality Master Trainer (Master Black Belt)

Coordinator and trainer for the deployment of the R&D Total Quality Program with emphasis on Six Sigma statistical modeling and process/product analysis. This included the training and certification of Six Sigma Green Belts and Black Belts.

1991 - 1994 AlliedSignal, Research and Technology, Des Plaines, IL

Senior Research Chemist

Responsibilities included research and leadership in modeling applications for new product development (thermoplastics, thermosets, coatings, fiber finishes, radiation-cured polymers), CFC (refrigerants and solvents) alternatives, new technology tools development (toxicology estimations, advanced polymer theories, Materials by Design, Polymers by Design, Advanced Fuels Properties), software maintenance and management.

1987 - 1991 AlliedSignal, Research and Technology, Des Plaines, IL

Research Chemist

Responsibilities included research and applications in: molecular modeling and design, new product development, engineering analysis, database development, statistical analysis.

**1984 – 1987 G. D. Searle Research and Development; Drug Design Section,
Department of Medicinal Chemistry**

Programming and Applications Consultant

Programming and applications in Drug Design, DEC VAX systems, Evans and Sutherland PS300, CHEMLAB-II, MOGLI, Gaussian-80, PRDDO, MM2, MACCS, REACCS, VAX program conversions, program parameterization.

**1985 - 1987 Intersoft Incorporated, Lake Forest, IL and CHEMLAB
Incorporated, Lake Forest, IL.**

Programming and Applications Consultant

Programming and applications in DEC VAX systems, Macintosh software development, graphics development, program conversions, parameterization. Program development on the CHEMLAB-II molecular modeling software.

1986 – 1987 University of Illinois, Department of Medicinal Chemistry

Post-Doctoral Research Associate

Research applications in polymer modeling and drug design, Monte Carlo molecular simulations, Quantitative Structure Property Relationships/ Quantitative Structure Activity Relationships (QSPR/QSAR).

1982 – 1986 University of Illinois, Department of Medicinal Chemistry

Research Assistant/Teaching Assistant

Programming and applications in VAX Systems, Evans and Sutherland PS300, IBM Systems, PC Systems, CHEMLAB-II, MM2, database development, and various molecular modeling programs, Organic synthesis and testing of cannabinoid based analgesics. Courses Assisted: Physics, Organic Chemistry, Analytical Chemistry, Biochemistry, Physical Chemistry, and Medicinal Chemistry.

ACADEMIC

Ph.D. in Medicinal Chemistry, University of Illinois, Medical Center, 1986.

B.S. in Chemistry, B.S. Mathematics, and B.S. Computer Science, Loyola University of Chicago, 1982.

AFFILIATIONS and HONORS

American Chemical Society (ACS) –

- Chemistry and the Law Division
- Committee on Chemical Safety
- 2013 Chair of the Chicago Section of the ACS
- Public Affairs Committee - Chicago Section Chair

American Association for the Advancement of Science (AAAS)

Society for Plastics Engineers (SPE)

ASM International (ASM)

Society of Manufacturing Engineers (SME)

SAE International (SAE)

American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE)

OTHER ACTIVITIES

Chair (2013) – Chicago Section of the American Chemical Society – The American Chemical Society (ACS) is the world's largest scientific society and the leading professional society for chemistry worldwide. The Chair of the Chicago Section provides leadership to 5000 member local chapter through workshops, lectures, scholarships, academic advisers and public relations.

National Science Advisory Board – Loyola University of Chicago – The National Science Advisory Board is a 12 member panel that serves at the request of the University President and provides advice on the scientific curriculum and development programs of the University. 2003-2007

SECURITY CLEARANCE LEVEL

SECRET as issued by DISCO

PATENTS
